TOBACCO CULTURE.

It Has Been Made a Success in New Mexico.

A GOOD GRADE CAN BE RAISED.

Some interesting experiments in to bacen culture have been made in New Mexico during the past few years and the fact has been established that to bacco can be raised in this territor and that its intelligent culture should bring a sice profit to New Mexico terest aroused through the correspond erce between James A. Davis, indus-trial commissioner for the Atchison Topcka & Banta Fe Ratiway company and the Albuquerque Commercia net were submitted to W. G. Pilking ton of Virginia, an authority on to

He reported as follows: "The tobaces you sent me has an excellent flavor, but owing to the fact that it was cut before being thorouga ly ripe it cured up green. In an dry a climate as New Mexico, with the prop or kind of need to begin with, tobac co ought to cure a splendid bright recolor without using any fire at all. But in order to get the right color and flavor two things are necessary-the right kind of seed and allowing th-

'In New Mexico the plant bed should be made in February and should be from twenty to fifty yards square, according to the size of the crop contemplated and should be irri The plant bed should be in thorough order and the seed shoulbe sown is it by the first of March.

"The plants should by ready to so out in June, if the ground is in goeorder; one rain or one trrigation we make the crop. Toleacco requires les water then any other plant I know o The great trouble with us is that whave too much rain, which makes i cabbage or bunch up. If we could have mosture just when we wanted it and not tee much, and such soil as yes

fluest tobacco in the world."
Further experimental planting less season resulted most satisfactorily These experiments were chiefly eas ried on by Major Frederick Muller a Santa Fo. Herman Blueber at Alba-querque and R. M. Stockton at Belen. in the contral part of the Rio Grandvalley. Encaking of the latter district

Stockton says: "I have grown tobacco on a small scale in this part of the territory for last intrty years with very satisactory results. Of varieties for cigars for the Clifton Copper company have bound the following to be as and the Symilcate Real Estate comfactory results. Of varieties for clear pecially adapted for this locality: Zin ner's Spanish Comstock and Havana an imported seed. Besides these nave also grown Bonanza, Sterling, Improved White Carley and General Grant. My opinion is that the fine Havana varieties will do as well here convenient

experiments have been made with to gobble him as soon as he shows his the small Caban Havana and larger That town of Isomera that the small Caban Havana and larger and nuti-corporation committee has Havana and of which did well, but the and nuti-corporation committee has have clark is waiting for Management of the small Havana and Clark is waiting for Management of the small Havana and Larger and gred it is fully the equal of the im-Caban arrive and superior ever to he high grade tobacco which them. we let years has brought Willett ounty . exas, into widespread fame and proved so highly profitable to the large of thereabouts. Samples of Mr. , uthe sweating process in the confidently prodicts that it will comthrough the test with results that will prove a surprise to those engaged gen erally in the tobacco trade. Properly handled it is said these fluor grade 1,000 parmin to the acre, worth in the markets of the county \$600 to \$1,00 This season through Mr. Blucher's in

this writing they are reported as I the property no value of any import very prombing stand. is very encouraging for the introduc-tion of a new and highly profitable in-dustry in New Mexico. With the results thus far attained, with a soil and elimate that seem to be specially adapted to tobacco culture and abundance of cheap and reliable labor obstacle in the way of making tobac co raising one of the chief sources of productive wealth throughout the Ri-Grande valley and the valleys of its
